

# Mainstream Java

## Introduction

# Moving Away from edu.duke.\*?

- edu.duke.\* simplifies various tasks
  - FileResource
  - URLResource
  - ...
- What if you do not have?
  - Option 1: Include and use (open source)!
  - Option 2: Java's IO libraries

# Moving Towards Java's IO Libraries

- Several concepts required
- Exceptions: have sort of seen
  - More detail required
- Java's IO library (actually two)
  - `java.io.*`
  - `java.nio.*`
- Popping up new file dialog?
  - Way more complicated, not going into
  - Look at code if you want...
